

OSU Telecommunications Network Center

Herrick Archives Number 379

This building was acquired by purchase from Ohio Bell Telephone Company to serve the new telecommunications network now being installed to provide a voice, data, and video network connecting the entire campus.

The Board of Trustees on May 3, 1985 authorized purchase of the building. Title to the property was given to the University by warranty deed executed August 26, 1985 and recorded on page 251 in Deed Book 2859.

The building is located at 320 W. Eighth Ave. See map below.

The building has a reinforced concrete frame and a brick exterior. It includes one floor and basement.

The areas are:

1,1 30,125 sq. ft. gross 28,544 sq. ft. net assignable (P)

Drawings in the Office of Campus Planning files indicate that the building was designed by Schooley-Cornelius-Schooley. The drawings are dated November 1, 1968 and revised February 21, 1969. They were further revised on February 3, 1970 to show "as built" conditions. Thus, it would appear that the building was constructed chiefly in 1969, possibly with some extension into early 1970.

The building is shown in Photographs X 30200 & X 30201.
